

Grainger Product Services

Bulk Recycling Referral

Process Overview

Any Grainger Customer in good standing has access to the Recycling Kit program (see specific Recycling Kit skus in Catalog). However, if a Customer requests Bulk Recycling Services, the Seller will simply **complete the Grainger Product Services Engagement Form (EF)** and Product Services will ensure Onyx receives it.

Seller submits Product Services Engagement Form (EF):

Product Services will forward this Form to:

Onyx Special Services, Inc.

Fax # 800-478-6055

Contact: Amanda Poverchuk

Onyx Special Services, Inc.: will upon receipt of Grainger's Engagement Form, communicate and work with Grainger customers direct to determine the customer's needs, provide pricing estimates, schedule pick-up and manage the packing materials, transportation, documentation, mercury reclamation and materials recycling for Grainger's recycling opportunities nationwide. Customers will be invoiced by Onyx Special Services, Inc. and will receive a Certificate of Reclamation upon completion of the recycle process.

Grainger's Catalog Recycle kits should be used when customers have limited space to stage product to be recycled.

Bulk Recycling should be positioned when pallet sized quantities can be used to dispose of the product.
